

GLOBAL ENERGY SOLUTIONS

Global Energy's Solutions division supports plant owners and EPC contractors by providing specialized consultancy services in plant optimization, process modeling and challenges to be faced in maintenance preparation and turnaround. We can also offer support in improving staff competence through in-house on-the-job training, as well as using our expert knowledge to recruit project staff meeting the appropriate competence requirements.

SOLUTIONS FOR OIL AND GAS

With all the challenges the oil and gas industry faces today, Global Energy's Solutions division provides specialized and custom-made solutions for plant optimization, maintenance shutdown, staff training and project resources recruitment.

Plant optimization and process modeling

Global Energy Solutions is a specialist in plant optimization and process modeling using optimization methods and process simulation. We have agreements with technology providers and combine our working experience from the running units with the scientific models, resulting in an 'expert knowledge' system.

Maintenance shutdown and turnaround

Global Energy has been engaged by clients to analyze and compile work scope and to execute job preparation, including site and materials inspection surveys. RCM reliability engineering and maintenance strategy analysis and development, RBI risk-based inspection, Implementation of maintenance and plant management systems.

Competence improvement training

Global Energy has the expertise to provide operator training, using GlobalTech methodology and experienced operator trainers conducting classroom and live plant training. Among other things we can perform in-depth training needs analyses, foundation skills training, trainer training, recruitment profile improvement etc.

Project resources recruitment

Our recruitment experts can support project staffing or can recruit and select entire project teams to execute your project. In accordance with your specific requirements, our experts will recruit and select only the staff who 'fit the picture', thus creating added value for your business.
